

e-ITB Plasma with $T_{e0}=3.5\text{keV}$, $n_{e_ave}=1.1\times 10^{19}\text{ m}^{-3}$ Was Stably Sustained for 328s by Two-77 and 154GHz, 0.34MW EC-Waves

EX/P8-1 Y. Yoshimura

> Power-up of center heating by improved ECH system showed possibility of steady-state operation of high performance e-ITB plasma
