

26th IAEA Fusion Energy Conference - IAEA CN-234

Wednesday, 19 October 2016

In - Vessel Components: FIP/2 (08:30 - 10:15)

-Conveners: anatoli Krasilnikov

time	[id] title	presenter
08:30	[814] Progress of Qualification Testing for Full-Scale Plasma-Facing Unit Prototype of Full Tungsten ITER Divertor in Japan & Progresses on WEST Platform Construction towards First Plasmas	Dr SEKI, Yohji
08:50	[244] Design and R&D Progress of Chinese HCCB TBS Program	Mr FENG, Kaiming
09:10	[327] Lessons learned for the Breeding Blanket designers from the design development of the European Test Blanket Module Systems (He, Tritium, Liquid Metal Systems)	Dr RICAPITO, Italo
09:30	[593] Development of Sensors for High-Temperature High-Pressure Liquid Pb/Pb-16Li Applications	Mr SARASWAT, Abhishek
09:50	[540] Liquid lithium loop system to solve challenging technology issues for fusion power plant	Dr ONO, Masayuki
